

Louna-Jukola 2015 Instructions for Media Photographers

- 1) All photographers must have their ID cards and Photo vests on while moving around the competition area. They are available for accredited photographers in the Media Center.
- 2) There are opportunities for photographs at the start, changeover and finish areas, as well as at several places in the forest. More information about these and a schedule of guided groups into the forest will be provided in the Media Center. Information will also be sent for accredited photographers by email before the event.
- 3) When moving in the competition area be careful to NOT disturb the runners' movements at any time. Taking pictures of the competition maps is strictly forbidden.
- 4) Special instructions for moving in the forest competition area:
 - All media members must be led by a Media Guide at all times in the forest competition area. Guided groups will leave from the Media Center and return there according to the schedule.
 - Media Guides will give you the necessary advice about the direction of the runners' movements and the safest areas to stand. In no way should you disturb the runners' movements.
 - During the darker times of the night flash photography of the leading runners is forbidden. The Media Guide will inform you of when it is possible to use flash.
 - It is recommendable to avoid colourful and reflective clothes.
 - Louna-Jukola's own photographers may also be moving in the forest competition area without guides. This is allowed for them.
- 5) The guides' and other Louna-Jukola workers' instructions must be followed at all times.
- 6) It is our desire to provide media members with many excellent opportunities to get that perfect photograph. With co-operation, we are sure that will be possible.

Good Shooting!
